## Education

---

- Sudan Academy for Banking and Financial Sciences** 2023  
Bachelor of Information Technology (Honour Degree) First Class

## Professional Memberships

---

- Member , ISACA Organization**  
Information Systems Audit and Control Association, March 2023

## Objective

---

As a Flutter developer, I have a strong understanding of best practices, project architecture, and clean code principles. I am proficient in working with widgets and various state management techniques such as GetX , Provider, and Bloc. MVC and MVVM design architecture. My expertise also extends to integrating APIs, Firebase, databases, local storage, and responsive design architecture. Additionally, I have a good background in implementing complex UI designs and conducting testing. With my comprehensive knowledge of Flutter development and its related technologies, I am well-prepared to contribute effectively to a software company's projects.

## Skills

---

- Flutter

- Android Native (JAVA)
- Java
- Firebase
- State Management (GetX,Provider,Bloc)
- Unit Testing
- Version Control (Git)
- PHP
- SQL
- Networking
- Microsoft Office
- Qt - QML

## Soft Skills

---

- Leadership
- Time Management
- Good in teamwork
- Excellent communication skills
- Accuracy and punctuality
- Work under pressure

## Certificates

---

- Starting With Flutter** - Google

- **Google Flutter & Dart** -- The Digital Adda
- **Android Mobile Application Development** - Meta
- **Introduction to SQL** -- SoloLearn
- **SQL Intermediate** -- SoloLearn
- **PHP REST API From Scratch** -- MindLuster
- **IT in Bussiness Success** --HP Life
- **Introduction to Cyber Security** -- Edraak
- **Version Control** - Meta
- **Creative Problem Solving** - University of Minnesota

## Projects

---

- **Student Attendance System Using QR Code**  
An integrated system comprising web and mobile application, crafted using Flutter, MySQL, and PHP technologies. This system empowers students to conveniently record their attendance via their smartphones by simply scanning a QR code.
- **Chat app with (PHP / MYSQL)**  
An innovative chat application, skillfully built using the Flutter framework, PHP, and MySQL. This application facilitates seamless communication, allowing people to engage in real-time conversations with one another
- **Chat app with Firebase**  
A dynamic chat application created with Flutter and powered by Firebase, enabling people to engage in lively conversations with each other.
- **Quran app**  
an application that contains all surahs of the holy quran created using Flutter framework
- **News App**  
A dynamic Flutter News App, delivering the latest news and updates from around the world in a user-friendly and engaging mobile experience
- **Music Player App**  
An intuitive Music Player app that you can access and listen to your songs .puts your favorite tunes at your fingertips
- **Cloud & Local Notes App (Firebase & Sqflite)**  
A versatile note-taking app that simplifies the way you capture, organize, and access your thoughts, ideas, and tasks. and access it from anywhere
- **Movies App**  
A user-friendly app designed exclusively for discovering movies. With a sleek and intuitive interface, users can easily explore a wide range of movies, browse through different genres, and access detailed information about each film.
- **Chatting With GPT App**  
Innovative chat application leveraging GPT-powered conversational AI for engaging and dynamic interactions. Seamlessly integrates natural language processing capabilities to provide users with intelligent responses and personalized experiences.

## Languages

---

- Arabic (Native)
- English (Professional Work Proficiency)
